The financial statements have been prepared under the historical cost convention.

#### Significant judgements and estimates

In the application of the company's accounting policies, the directors are required to make judgements, estimates and assumptions about the carrying amount of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised where the revision affects only that period, or in the period of the revision and future periods where the revision affects both current and future periods.

#### Turnover

Turnover represents the value of services under contracts, provided in the year, exclusive of Value Added Tax, to the extent that there is a right to consideration and is recorded at the value of consideration due.

#### Financial instruments

Basic financial instruments are recognised at amortised cost using the effective interest method, except for investments in non-convertible preference and non-puttable preference and ordinary shares, which are measured at fair value, with changes recognised in profit or loss.
